

LinkedIn Table Join Instructions

Query for Joining LinkedIn tables(l_company, l_person, l_education):

```
SELECT c.ID, p.personID, e.education_id, c.companyName, c.companySize, p.name, p.current_position,  
p.from_date, p.to_date, p.location, e.degree, e.from_date, e.to_date
```

```
FROM linkedin.l_company c
```

```
JOIN linkedin.l_person p
```

```
ON c.companyName = p.company
```

```
JOIN linkedin.l_education e
```

```
ON p.name = e.name;
```

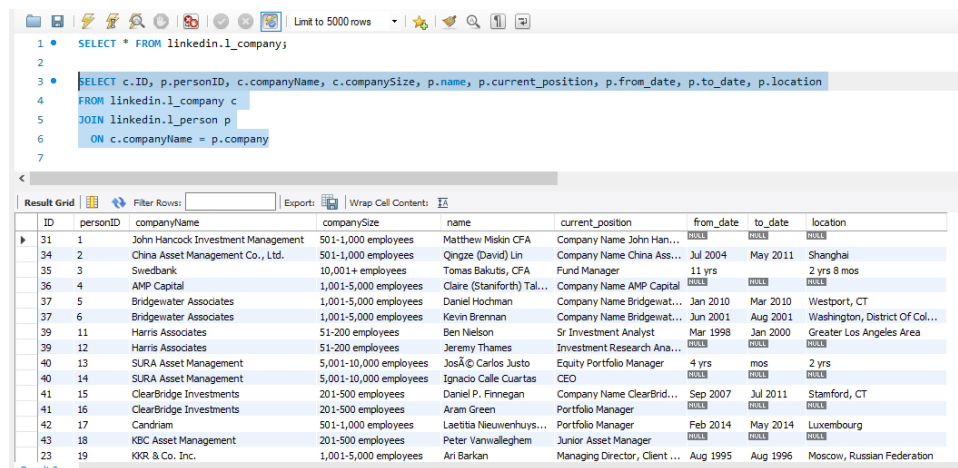

Query for joining l_company and l_person:

```
SELECT c.ID, p.personID, c.companyName, c.companySize, p.name, p.current_position, p.from_date,  
p.to_date, p.location
```

```
FROM linkedin.l_company c
```

```
JOIN linkedin.l_person p
```

```
ON c.companyName = p.company
```

The screenshot shows a SQL query editor with a query to join LinkedIn tables. The query is as follows:

```
1 SELECT * FROM linkedin.l_company;  
2  
3 SELECT c.ID, p.personID, c.companyName, c.companySize, p.name, p.current_position, p.from_date, p.to_date, p.location  
4 FROM linkedin.l_company c  
5 JOIN linkedin.l_person p  
6 ON c.companyName = p.company  
7
```

Below the query editor is a "Result Grid" showing the results of the query. The grid has 9 columns: ID, personID, companyName, companySize, name, current_position, from_date, to_date, and location. The results are as follows:
